CARE INSTRUCTIONS

Upon issue, wearers name and date of issue should be printed on the label provided. Pro Choice Safety Gear hard hats should be inspected for any deterioration or damage prior to use. Pro Choice Safety Gear hard hats with excessive damage (cracks, colour distortion or deep abrasions) should be disposed of.

Entire hard hat, including harness, should be cleaned with warm soapy water (avoid any solvents) on a regular basis and sweatband replaced.

Industry recommends hard hat shell be replaced after 3 years of working life. Components of the hard hat harness may deteriorate during its normal working life, and as a result the harness should be replaced at intervals no longer than 2 years.

To extend your hard hat working life, avoid excessive exposure to UV and any solvents.

HARD HAT PRINTING SERVICE

The need to distinguish workers in various occupations on a work site can be for safety or convenience. For example, having a safety officer readily identified by the colour of their hard hat can improve efficiencies; while being aware of who is a visitor or sub-contractor can improve security.

To further enhance these advantages, ProChoice now offers a pad printing and a vinyl printing service that can customise hard hats - before a customer takes delivery.

Speak to your ProChoice sales representative about adding value to your hard hat sales by utilising our pad printing or vinyl cut print service.
