Tyrewise

What is Tyrewise?

- Tyrewise is the accredited, regulated product stewardship scheme for end-of-life tyres in Aotearoa New Zealand.
- Designed by industry, supported by Government, Tyrewise is replacing current disposal charges with a new stewardship fee ending tyre waste to support research and innovation to recycle or repurpose 90% of end-of-life tyres.

What tyres are covered by Tyrewise?

- All pneumatic (Air filled) and solid tyres for use on motorised vehicles, including cars, trucks, buses, motorcycles, aircraft, trailers and off-road vehicles.
- Most agricultural machinery are also included.

How does the Tyrewise scheme affect me?

- From 1 March 2024 the tyre stewardship fee is paid when purchasing new tyres.
- Charges vary based on the size and function of the tyre and assigned an average Equivalent Passenger Unit (EPU) value. The fees are modelled on \$6.65 excl GST per EPU.
- This fee must be passed on to consumers.
- TWL must ensure the fee is transparently declared at each point in the tyre sales process.
- The fee is identified as Tyre Stewardship Fee on the TWL invoice to the consumer.
- For any additional information visit www.tyrewise.co.nz/tyrewise-toolbox

The Ministry for the Environment (the Ministry) is responsible for monitoring compliance with the regulations and enforcing obligations under the Waste Minimisation Act 2008. Further information can be found at [Compliance monitoring and enforcement of the Waste Minimisation Act 2008](#)
