

PRODUCT INFORMATION

56pc General Metec EVA Tool Kit

Part # TCE56

The EVA foam is laser cut to fit the exact shape of each tool for a perfect fit and added protection.

The size and description of every tool is etched into the foam so you don't have to waste time searching for that 10mm socket again!

When a tool is removed it's position is highlighted in red so it is easy to see what tool has been removed from your set and also to see where to put it back.

Supplied in the Teng Tools TC540 Cantilever style Tool Box with 5 individual compartments, padlock facility, full length piano hinges and turned edges for added safety.
